

AMENDMENTS

In the Specification:

Please amend the 4th paragraph on page 10 (lines 16-20) as follows:

The antenna 50 in Figs. 4C and 4D, as clear from Fig. 4D, when the portable telephone is used, forms a predetermined angle θ_2 with the portable telephone 10 in the longitudinal direction, that is, with the long sides of the main body case 20 and cover case 30. Specifically, the predetermined angled θ_2 is an acute angle with respect to the longitudinal direction of the main body case 20.
